

University of Duhok

Aram Omer Mohammed

Preface

philosophy and vision of teaching and academic lifetime.

During the undergraduate stage, I found special feeling about being in my college (architectural department) and preparing the lectures and developing something new about the strategies of expanding the idea of teaching to the students in a hand, and on the other hand, and on the other hand to serve my country with the academic researches and practical projects which came from the variety of teaching the students.

The student is the centre of this process, he must discuss, present, and be active more through the classes in order to not be something boring to him, so I used to prepare some (group teaching) in my classes in which the students participate the rule of the lecturer through the presentation which give him more character and strong personality, and the lecturer will be able to present more and more information and details about his subject through in less time of the lecture.
